Product Requirement Document (PRD)

Khushboo Scholar Learning & Engagement Dashboard

Organization: Cybage – Khushboo Scholarship Program

Project Type: Hackathon Prototype / Academic Innovation Project

Prepared By: Prasad Wadkar

Version: 1.0

Status: Approved for Prototype Development (Dummy Data Only)

---

1. Executive Summary

The **Khushboo Scholar Learning & Engagement Dashboard** is a centralized digital platform envisioned for the Cybage Khushboo Scholarship Program. The objective of this platform is to enhance student learning, engagement, tracking, and mentor–mentee collaboration through a single, structured system.

This dashboard aims to replace fragmented tools such as WhatsApp messages, Excel sheets, and manual tracking processes with a scalable, transparent, and role-based solution.

---

2. Background & Problem Statement

Currently, multiple activities under the Khushboo Scholarship Program—such as learning session updates, attendance tracking, resource sharing, and mentor interactions—are managed across disconnected platforms. This results in:

- Manual and error-prone attendance processes
- Limited visibility into student engagement and learning continuity
- Communication overload via WhatsApp groups
- Difficulty in tracking holistic student progress

There is a clear need for a **single integrated platform** that centralizes learning, communication, and reporting.

---

3. Project Objectives

The primary objectives of this project are to:

- Create a centralized learning and engagement platform for Khushboo scholars
- Enable automatic and transparent attendance tracking
- Improve visibility into session engagement and learning continuity
- Facilitate structured mentor–mentee interactions
- Provide a single source of truth for announcements and updates
- Generate meaningful progress and engagement reports

---

4. Stakeholders

Stakeholder	Role
Students (Khushboo Scholars)	Primary users of the learning platform
Mentors	Learning facilitators and progress reviewers
Cybage CSR/Admin Team	Program oversight and reporting
Hackathon Review Panel	Evaluation and feedback

---

5. User Roles & Access Control

5.1 Student

- Access learning resources and session videos
- Automatic attendance via session completion
- View personal dashboard (attendance, achievements, updates)
- Participate in Q&A discussion forum
- View mentor feedback and progress reports

5.2 Mentor

- Upload learning resources and session videos
- Upload offline attendance using CSV files
- Track student engagement and session continuity
- Manage mentor–mentee meetings and feedback

5.3 Admin (CSR Team)

- Manage users and roles
- Publish announcements and event updates
- Monitor platform usage and analytics
- View consolidated student and mentor reports

---

6. Functional Requirements

6.1 Learning Resources Management

- Centralized repository for free educational resources
- Resource categories:
  - Technical Skills
  - Soft Skills
  - Career Guidance
- Upload permissions for Admin/Mentor
- Read-only access for Students

6.2 Learning Sessions & Video Tracking

- Upload recorded learning session videos
- Track:
  - Session start and end
  - Video completion percentage
  - Drop-off point
- Attendance automatically marked when completion ≥ 80%

6.3 Attendance Management

Online Sessions: - Auto attendance based on video completion logic

Offline Sessions: - Mentor uploads attendance via CSV - System validates and maps data to student records - Attendance reflected on student dashboards

---

6.4 Student Dashboard

Each student will have a personalized dashboard displaying: - Attendance percentage - Completed learning sessions - Achievements / badges (dummy data) - Placement updates (dummy data) - Announcements and alerts

6.5 Announcements & Communication

- Platform-based announcements
- Session and event notifications
- Acts as a structured replacement for WhatsApp communication

---

6.6 Q&A / Discussion Forum

- Access restricted to Khushboo beneficiaries
- Topic-based discussion threads
- Question posting and replies

6.7 Mentor–Mentee Program

Mentor–Mentee Mapping - Capture mentor and mentee profiles - Assign mentors to students

Meeting Feedback - Meeting date and duration - Discussion summary - Feedback and remarks

Progress Tracking - Individual student progress reports - Mentor observations and engagement indicators

---

6.8 Reports & Analytics

- Attendance and participation reports
- Session engagement insights
- Mentor–mentee interaction summaries

---

7. Non-Functional Requirements

- Dummy data usage only
- Secure authentication and role-based access
- Scalable architecture (prototype-level)
- Clean, intuitive, and responsive UI

---

8. Assumptions & Constraints

- No real student or mentor data will be used
- No third-party system integrations
- Prototype will not be deployed to production
- Internet connectivity assumed for access

---

9. Out of Scope (Future Enhancements)

- AI-driven engagement analysis
- Screen activity monitoring
- Mobile application
- Integration with real placement systems

---

10. Success Criteria

The project will be considered successful if:

- End-to-end workflows are clearly demonstrated
- Attendance automation works accurately
- Dashboards are intuitive and informative
- CSR team feedback is positive during review

---

11. Conclusion

This PRD defines a structured and professional roadmap for developing a Learning & Engagement Dashboard tailored to the Cybage Khushboo Scholarship Program. The solution aligns with hackathon objectives while addressing real-world program management challenges.

Appendix A: Feature Summary Matrix

Module	Key Capabilities
Learning Resources	Centralized, categorized, mentor-uploaded content
Attendance	Video-based automation, CSV upload for offline sessions
Dashboard	Attendance, achievements, placements, updates
Communication	Platform announcements replacing WhatsApp
Engagement	Session continuity, completion tracking

Module	Key Capabilities
Mentor–Mentee	Mapping, feedback, progress reports
Reports	Attendance, engagement, mentor insights

Appendix B: High-Level User Flow

1. User logs in (Student / Mentor / Admin)
2. Dashboard displayed based on role
3. Student accesses learning sessions and resources
4. Attendance automatically tracked
5. Mentor uploads offline attendance and feedback
6. Admin reviews reports and publishes announcements

Appendix C: Compliance & Data Privacy Statement

This prototype is developed strictly for academic and hackathon purposes. All data used within the system is dummy data. No personal, sensitive, or identifiable student information is collected, processed, or stored. The system complies with Cybage CSR legal and compliance expectations.
